

purposes. And they were the result of a competitive process. For those who were not picked, let me say we're coming back next year with over \$500 million in new funds for these kinds of projects, and we will be doing more.

But the reason it's important to do it this way is that we have all these defense technologies that need to be put to work in the commercial sector. And in terms of the award in San Diego, let me remind you that there are literally thousands of bridges in this country, thousands, that need repair and a lot of new ones that need to be built. So if this technology can be put to work in doing that, they shouldn't be able to push anybody else with a genuinely competitive product out of the market, because there are so many thousands of bridges that need repair—and cities and local governments and States are just beginning to face up to those responsibilities—and because in the 1980's this country walked away from its infrastructure needs. So, I don't see that as a problem, particularly in this sector of the economy.

**Mr. Culea.** You mentioned awards to Redondo Beach, Fullerton, I believe two others. Most of the awards, though, were out of State. We have 250,000 defense jobs that were lost here. What do you say to those people who need help?

**The President.** Most of the awards were out of State, but California got the lion's share of the awards, ran away with the contest, as well you would expect, because there are so many defense workers out of work and because there's so much technology capacity. So the State did very well on this first round, and I would expect that there will be more in the second, third, and fourth rounds.

Keep in mind, this was just the first of four rounds between now and November, and then next year we'll have another \$500 million-plus to put in a whole new round of these projects. So I would say to them, I'm going to fund as many of these projects as possible; I'm working as hard as possible.

I also would point out that in the San Diego area, two other things have been done which will help in the base closing and reorganization. There will be a net gain of 5,200 jobs in the San Diego area, and we just released from export controls \$37 billion worth

of computer, supercomputer, and telecommunications equipment, which will open new markets and create many thousands of jobs in California; many of them will be in southern California.

So I'm moving as quickly as I can on this, and I hope that the Members of the Congress will all be as supportive as Congresswoman Lynn Schenk has been of this project, because if we had more folks like her who were willing to fund this project at higher levels, we can move even more quickly and help even more California working people.

### **Defense**

**Mr. Culea.** This being a Navy-Marine town, there is concern that our military be prepared for anything in the future. What can you say to that as far as defense conversion and our ability to be prepared for future contingencies?

**The President.** The head of naval research was here today with me, Admiral Pelaez. He made the point that in a very profound way, this program we announced will help to keep our defense strong, because we know that the defense budget's going to be reduced. This program will help to use the commercial research and development sector to keep the defense technology strong, even as we're using defense technologies to create jobs in the commercial sector. That is, by putting the two together, we'll be able to get a bigger bang for our defense dollar. So that even though there will be some reduction in defense spending, we'll be able to keep ahead of all of the other countries in the world and as far as we need to be on technology.

**Mr. Culea.** Could you give us an idea of the control of this money in some defense contractors? Jobs have been cut, profits go up, and then bonuses are given to top executives. What about the control of the money going to these firms?

**The President.** Well, first of all, let me explain what happens now. We have announced the projects that were worthy and that won the right to participate in this project. Now, what will happen is the group of people from our Government's side who work in this area will negotiate with each and every company to make sure that they put

up their share of the money and to determine how they will spend this money.

This money, in almost every case, is not an overwhelming amount of money for these companies. What this money will be necessary for is to actually invest in developing this new product and marketing it commercially. So there won't be much of an opportunity for a rake-off here, otherwise the whole thing will collapse. And they have to agree in advance not only on a contribution schedule from their point of view but on what the money's going to be spent on. And I think we'll avoid those abuses.

**Mr. Culea.** All right. Mr. President, thank you so much for sharing your thoughts, and I hope you get a better seat next time.

**The President.** Thank you very much.

NOTE: The interview began at 12:02 p.m. The President spoke via satellite from Room 459 of the Old Executive Office Building.

### **Appointment of Executive Director of the White House Conference on Aging**

*October 22, 1993*

The President announced that he has appointed Robert B. Blancato as Executive Director of the White House Conference on Aging (WHCOA). The WHCOA, located at the Department of Health and Human Services, serves as a focal point for the development of national policy on aging issues.

"Robert Blancato is a leading expert in aging policy who has been recognized for his work on numerous occasions," said the President. "I look forward to his work at the White House Conference on Aging."

NOTE: A biography of the appointee was made available by the Office of the Press Secretary.

### **Appointment of United States Representative to the United Nations Human Rights Commission**

*October 22, 1993*

The President announced his intention today to appoint former Congresswoman Geraldine Ferraro as the U.S. Representative

to the United Nations Human Rights Commission (UNHRC), with the rank of Ambassador.

"In addition to earning her place in our own country's political history, Geraldine Ferraro has been a highly effective voice for the human rights of women around the world," said the President. "As alternate head of the U.S. delegation to this year's session of the UNHRC, she spoke eloquently on behalf of women in the former Yugoslavia and brought all of the parties involved to a consensus position. I look forward to her continuing her strong and much-needed advocacy in this new position."

NOTE: A biography of the appointee was made available by the Office of the Press Secretary.

### **Nomination for United States District Judges**

*October 22, 1993*

The President announced the nomination today of his choices for four U.S. District Court vacancies: Donetta Ambrose and Gary Lancaster, both for the Western District of Pennsylvania; Wilkie D. Ferguson for the Southern District of Florida; and Charles A. Shaw for the Eastern District of Missouri.

"I am committed to giving the American people a Federal judiciary marked by excellence, by diversity, and by a concern for the personal security and civil rights of all Americans," said the President. "With these nominations today, we are giving just that to the people of Pennsylvania, Florida, and Missouri."

NOTE: Biographies of the nominees were made available by the Office of the Press Secretary.
